HIGH SCHOOL IN MÄNTTÄ
Preparatory studies for medicine, art, music and sports
Our school is a versatile common school where you can complete a double or triple degree.

You can study in multiple ways and choose for instance preparatory courses for medicine and also art, music and sports.

The Art Town of Mänttä-Vilppula is a lively small town in Upper Pirkanmaa, about 90 kilometres from Tampere and Jyväskylä. Our town has culture and art, beautiful nature and plenty of opportunities for hobbies.
The lines for medicine and natural sciences

From autumn 2021 onwards you can attend a line focusing on medicine and natural sciences. This line gives you a chance to study additional courses from biology, chemistry, physics and mathematics.

This line collaborates with different universities and other partners. In addition, preparatory courses are organized for the entrance examinations of the faculty of medicine and they are included in the high school studies.
Art, music and sports

There is a large set of courses available at Mänttä high school for art, music and sports. How would it sound to have for instance ice hockey and boxing connected to your studies, playing in bands or studying and making art? You can choose versatile courses on art and music and study at the Top Sports Academy at Mänttä high school.

In art, we work together with the Autere adult education centre, the Serlachius museum and Mänttä Art Festival. The Merikanto music institution is our partner in music and with sports we work with SASKY (Municipal Education and Training Consortium) and with the local sports clubs.
Connect your high school studies with vocational studies

With us you can carry out a double or triple degree by combining the high school, vocational school and the matriculation examination. Our partner SASKY is responsible for the vocational training.
Our students have typically done well in the matriculation examination through the years. In many subjects, when comparing high schools, we are above the national average. Your success at school is extremely important for us. Thus our teachers and student counsellor offer you continuous guidance with your studies and help you plan your course selection depending on your future studies.

We work with multiple different higher education partners so you can take orientation studies, university courses and study units already while studying at the high school. These are accepted as a part of your upper secondary degree.

You can find a pleasant library at our school where you can study and spend your breaks. There is also a small kitchen meant for the students.

When you come to study at our school we are able to offer you a student flat just around the corner. So, accommodation during your studies is already taken care of!
Welcome to study at Mänttä high school!
